## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 05 June 2007 has been entered and considered.

### ***Allowable Subject Matter***

Claims 1-14, 16-21, and 24 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent claim 1, relevant prior art of record did not disclose, alone or in combination, the liquid crystal display panel as claimed comprising a sealing connection part wherein the end patterns cross over each other and are of a size such that a sealant of the connection part does not come into contact with the cut line when the first

and second substrates are attached together (product by process limitation resulting in no connection part sealant at or beyond the edge of the finished display panel).

The closest reference is Yoshizoe, US 200310025867.

Yoshizoe discloses and shows in Figs. 3, 4 and 7, a seal pattern structure for a liquid crystal display panel, comprising: a first and second substrates (2) having at least one image display part (8);

a start pattern (12) on the first substrate (2) formed from a point spaced apart from the image display part to a point adjacent to an outer edge of the image display part;

a main pattern (4) connected to the start pattern and encompassing the outer edge of the image display part; and

an end pattern (14) connected to the main pattern and formed from the outer edge of the image display part to a point spaced apart from the image display part,

liquid crystal (16) provided in the image display part (Fig. 7);

wherein a connection part between the start pattern and the main pattern and a connection part between the main pattern and the end pattern cross each other.

However, no prior art was found with proper motivation to combine to meet the limitations above. IDS filed 05 June 2007 was found to have related information insufficient to form new grounds of rejection.

As to claims 2-14, they are, directly or indirectly, properly dependent upon claim 1 with allowable subject matter above.

As to independent claims 21 and 24, relevant prior art of record did not disclose, alone or in combination, the method of making a liquid crystal display panel as claimed comprising forming a sealing connection part wherein the end patterns cross over each other and are of a size such that a sealant of the connection part does not come into contact with the cut line when the first and second substrates are attached together.

The closest reference is Yoshizoe, above.

As to claims 16-20, they are, directly or indirectly, properly dependent upon claim 21 with allowable subject matter above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
